# Chisom Ejiofor Abreu

Staten Island, NY 10303 | (347)-265-2881 | chisom.ejioforabreu@baruchmail.cuny.edu | https://www.linkedin.com/in/cej00/ | https://github.com/ce1445

## Education

**Baruch College CUNY, Weismann School of Arts and Science** — New York, NY

*Bachelor of Business Administration in CIS (Cybersecurity) — 3.7 GPA* — *Expected Graduation: May 2027*

- **Relevant Coursework:** Database Management Systems

## Technical Skills

**Networking Tools**: Wireshark, Splunk, Metasploit, Nmap
**Languages**: Python, HTML/CSS, JavaScript/JQuery, SQL
**Developer Tools**: VS Code, PyCharm, Bootstrap
**Libraries**: pandas, NumPy, Matplotlib, turtle
**Operation Systems**: Windows 10/11, Linux
**Office Tools**: MS (Word, Excel, Powerpoint)

## Projects

**Achievement Tracker Database System** | *Microsoft Access, SQL, VBA* — September 2024

- Designed and implemented a relational database system to manage players, games, platforms, achievements, and session data using normalized tables and enforced relationships
- Developed SQL queries and reports to analyze player progress, game engagement, and achievement completion rates
- Built 5+ automated forms and workflows using VBA, including navigation controls and data validation to improve data entry accuracy and system usability
- Implemented role-based form structure and referential integrity to maintain data consistency and prevent orphaned records

**Project Aequis** | *Scrum Master* — Summer 2026

- Facilitated sprint planning, stand-ups, and retros for a 3-person team building an AI system that converts internal policy documents into personalized, employee-specific training modules with source-level citation tracking
- Coordinated cross-functional work between policy-parsing, module generation, and HR-approval workflow design for a framework-agnostic platform, using HIPAA, and CCPA as test cases to validate and demo functionality
- Managed a human-in-the-loop review cycle (citation check → HR approval → assignment), building in safeguards against AI error and over-reliance on unverified model output
- Kept the team on track to deliver a working demo and business case projecting reduced compliance-breach exposure and onboarding overhead

## Experience

**Cybersecurity Apprentice** — June 2026 – Present

*NYC Tech Talent Pipeline Residency* — *New York, NY*

- Develop cybersecurity fundamentals through technical lectures on networking, security concepts, and threat analysis.
- Apply cybersecurity concepts in hands-on labs and simulated security scenarios to build practical skills in incident response, vulnerability identification, and security analysis.
- Participate in professional development workshops focused on resume building, LinkedIn optimization, and interview preparation.

**Outreach & Digital Media Intern** — July 2025 – August 2025

*House of Fields Charity Inc.* — *Staten Island, NY*

- Supported digital platform management across 2+ social media accounts, helping maintain secure access controls and consistent branding
- Managed and updated the organization's website using WordPress and third-party plugins, performing basic troubleshooting, content updates, and functionality checks to maintain site reliability
- Represented the organization at community events, engaging with attendees and promoting nonprofit initiatives
