WORK EXPERIENCE

NYC Tech Talent Pipeline Residency New York, NY
Fellow June 2026 – Present
- Analyzed sales performance and stock price trends for companies including NVIDIA and Apple using Python, machine learning, SQL, and Tableau.
- Analyzed large datasets using Excel formulas, PivotTables, and data tables to support collaborative business projects.

MXN Commerce USA, Inc. Hackensack, NJ
Accounting & Reporting Intern Jan 2023 – Jan 2024
- Analyzed sales, inventory, and cash flow data across 5 international branches and prepared weekly and monthly Excel reports using PivotTables and VLOOKUP to support financial decision-making.
- Standardized financial recordkeeping across 5 international branches (US, UK, South Korea, Italy, Japan) by maintaining shared internal servers, improving data accessibility and cross office consistency.

PROJECTS

MoveMaker: Football Transfer Risk Assessment Tool New York, NY
Capstone Project Jun 2026 – Aug 2026
- Cleaned and processed transfer and contract data across five major European leagues to develop a web-based decision-support tool for contract evaluations.
- Built and validated four machine learning models that generate real-time predictions for player performance, club retention, and market-value risk based on proposed contract length.
- Integrated model outputs into an interactive web interface that allows users to search players and evaluate proposed contract scenarios.
- Presented the tool and methodology to nearly 70 attendees at the NYC Tech Talent Pipeline Residency.
